

**André
DESPOUYS PASCUAL**
23 years old

**Web developer and Future
Security Analyst**

I am a young student with almost 3 years of experience in the web industry. My curiosity has led me to the field of cybersecurity, where I am currently learning and training to find my place in the industry. My objective is to help businesses and people around the world have better digital security.

- Executed meticulous management of extensive databases, prioritizing both security and reliability to ensure seamless and dependable operations.

International Adventure

2019 - Today

Embarked on an exciting journey at the age of 19, leaving my homeland to pursue the dream of studying and working in France.

The initial challenge was to immerse myself in a new language and culture, necessitating relentless effort to master French and sustain my livelihood. This journey has not only been about survival but a continuous commitment to learning and self-improvement across various domains.

Today, as I thrive in France, the ongoing pursuit of knowledge remains a cornerstone of my personal and professional growth.
